

HD Cleaner Andritz Ahlcleaner RB 300 HD

Article No. 4796

Technical data:

Machine:	HD Cleaner Andritz Ahlcleaner RB 300 HD
Producer:	Andritz
Type:	Ahlcleaner RB 300 HD
Size:	None
Capacity:	1900 l/min
Year:	None

Description:

the AhlCleaner RB300Hd

are large-diameter cleaners designed to operate at stock consistencies of up to 4.5%. Heavy debris, such as sand, dirt, metal, glass, along with a high percentage of smaller impurities, can easily be removed with minimum amount of fiber loss by the utilization of a junk trap. These cleaners are used in recycled fiber lines for coarse particle removal and in bale pulp lines as protection before refiners and deflakers.

- ☒ durable plastic and ceramic cones
- ☒ directions of feed and accept connections can be selected
- ☒ Minimum space requirements
- ☒ Easy to operate, maintain, and install
- ☒ Special designed spool piece for reduced wear on junk trap gate valve
